

C IS FOR CHIMERA Anthology

C IS FOR CHIMERA, cover copy

This installment of Rhonda Parrish's alphabet anthology series asks skilled storytellers to write around the theme of chimera. The resulting tales are part fable, part poem, part dream. But like any chimera, the parts make up a greater whole.

Blend reality with fantasy. Mesh science fiction with mystery. Mix history with what should have been. They are all chimera.

A shadow tells a tale of schoolyard bullies. A long-vanished monster returns from the cold dark. Make-up makes up a life. Alchemy, Atlantis, and apocalypse. These 26 tales bring both chaos and closure to dark and elusively fantastic geographies.

PRAISE FOR *C is for Chimera*:

"I dare say it's an anthology with something for just about anyone who likes short speculative fiction." -- **Jennifer Crow**

"There are 26 stories in this anthology that range from fantasy to sci-fi to dark to hopeful to just plain weird (in a good way). I recommend picking this anthology up if you like a variety of tales that will fascinate you." -- **Elesha Teskey**

"The format is like the previous two (**A is for Apocalypse, B is for Broken**), where each author writes a story around a word beginning with their given letter. What I really love is that the word isn't given until the very end. Sometimes the word is obvious. Sometimes not so much... If you can get your hands on it, I would recommend this anthology." -- **S. L. Saboviec**

"*C is for Chimera* is an enjoyable read and I look forward to seeing what happens with D and the rest of the Alphabet." -- **Reb Kreyling**
